Professional Summary

Computer Science undergraduate with a strong interest in Artificial Intelligence and Machine Learning. Experienced in building applications using Python and backend frameworks. Proficient in data structures, algorithms, and problem solving. Interested in applying software development and machine learning skills to real-world problems.

Education

Graphic Era (Deemed to be University) <i>Bachelor of Technology in Computer Science and Engineering</i>	2023 – Present <i>CGPA: 7.9</i>
ICSE Board <i>Senior Secondary (Class XII)</i>	2023 <i>Percentage: 90%</i>
ICSE Board <i>Secondary (Class X)</i>	2021 <i>Percentage: 91%</i>

Projects

AI Resume Skill Matcher Python, NLP, FastAPI – Developed a system to compare resumes with job descriptions and calculate a match score. – Performed text preprocessing and extracted relevant skills for comparison. – Built backend functionality using FastAPI and connected it with a simple frontend interface. – Displayed matched and missing skills to help improve resume quality.	2025
Movie Recommendation System Python, Machine Learning, FastAPI – Built a recommendation system that suggests movies based on user preferences. – Used similarity techniques to identify and recommend relevant movies. – Implemented backend services using FastAPI for handling user input and responses.	2025
Smart Parking Management System Python, Flask, YOLOv8 – Developed a system to detect parking slot occupancy using computer vision. – Integrated YOLOv8 with a Flask application for real-time detection and updates. – Worked on system integration and ensured smooth data flow between components.	2025
Online Complaint Management System Web Development – Developed a web-based platform for users to submit and track complaints. – Implemented user authentication and structured complaint records for better management. – Designed a clean and user-friendly interface for easy navigation. – Integrated frontend and backend to ensure smooth data handling.	2026

Technical Skills

Programming Languages: Python, C, C++, Java
Machine Learning & AI: NLP, Recommendation Systems, Model Training, Data Preprocessing
Backend & Frameworks: FastAPI, Flask
Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Searching, Sorting
Tools & Technologies: Git, GitHub, VS Code
Core CS Concepts: Object-Oriented Programming, Operating Systems, File Handling

Soft Skills

Problem Solving, Team Leadership, Communication, Time Management, Collaboration
