## Professional Summary

Computer Science undergraduate with a strong interest in Artificial Intelligence, Machine Learning, and Full-Stack Development. Hands-on experience building custom web applications that use machine learning to solve practical problems. Strong foundation in data structures, algorithms, and logical problem-solving, with a passion for writing clean code and developing smart, user-friendly software.

## Education

|                                                                                                                   |                                           |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Kinosoca - AI-Powered Movie Discovery Platform</b>   React, FastAPI, PostgreSQL<br>– Built a full-stack movie discovery platform with AI-powered semantic search, mood-based recommendations, and personalized movie suggestions using React, Tailwind CSS, FastAPI, and SQLAlchemy.<br>– Implemented JWT authentication, user profiles, protected routes, watchlist management, and status tracking (saved/watched) for movies.<br>– Integrated TMDB APIs to provide trending, popular, top-rated, similar movies, streaming availability, and detailed movie information.<br>– Developed REST APIs using FastAPI and PostgreSQL for movie data handling, search, filtering, and recommendation logic. | <b>2026</b> |
| <b>HireAmigo - AI-Assisted Resume Screening Platform</b>   React 19, Vite, FastAPI, Python, PyMuPDF<br>– Built a full-stack resume screening system that ranks candidates against job descriptions using a rule-based scoring engine.<br>– Implemented batch PDF resume parsing and structured extraction using PyMuPDF for automated candidate data processing.<br>– Designed a weighted evaluation model combining Must-Have/Nice-to-Have tags with keyword-based relevance scoring for accurate ranking.<br>– Developed an interactive HR dashboard with dynamic score buckets, anti-bias anonymization, drag-and-drop reassignment, resume preview, and CSV export.                                    | <b>2025</b> |

## Technical Skills

**Programming Languages:** Python, C, C++, Java

**Frontend:** React 19, Vite, Tailwind CSS, TypeScript, HTML, CSS, JavaScript

**Backend & Frameworks:** FastAPI, REST APIs, Python

**AI & Scoring Systems:** Rule-based ranking systems, keyword matching, weighted scoring models, heuristic NLP techniques

**Databases:** SQLite (basic)

**Data Structures & Algorithms:** Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Searching, Sorting

**Tools & Technologies:** Git, GitHub, VS Code, Docker (basic)

**Libraries & APIs:** TMDB API, JWT Authentication, Axios

**Concepts:** Authentication (JWT-based), pagination, filtering, semantic search, recommendation systems

## Soft Skills

Analytical Problem Solving, Project Leadership, Technical Communication, Task Prioritization, Cross-Functional Collaboration
